Chandler Concrete Co Inc
P.O. Box 131
1006 S. Church St.
Burlington, NC 27216

SUBJECT: Rescission Request
Application No. 3200217.16A
Chandler Concrete Co Inc
Facility ID: 3200217, Durham, Durham County
Permit Class: Small
Permit No. 05356R08

Dear Mr. Waegerle:

The Division of Air Quality has reviewed your letter and supporting documentation received August 1, 2016 requesting rescission of Permit No. 05356R08.

Based on this information, the facility does qualify for exemption from permitting since the facility is currently classified as "small" and the facility-wide actual emissions of particulate matter (PM10), sulfur dioxide, nitrogen oxides, volatile organic compounds, carbon monoxide, hazardous air pollutants (HAP), and toxic air pollutants (TAP), from previous years, each has been less than five (5) tons per year and the total actual aggregate emissions of these pollutants have been less than 10 tons per year. The letter also indicated that there are no future plans to make any changes that would increase emissions above these exemption thresholds.

Therefore, in accordance with your request, Air Quality Permit No. 05356R08 is hereby rescinded, effective the date of this letter. It should be noted that this exemption from permitting does not exempt Chandler Concrete Co Inc from complying with the applicable emission control standards.

Mr. Kenneth Waegerle

Page 2

Furthermore, should you decide to modify the processes such that the result is an increase of emissions above the emission thresholds given above, an Air Quality Permit may be required and Chandler Concrete Co Inc should contact this Regional Office prior to such actions for a permit or registration applicability determination.

This exemption from the permitting requirement is based upon your statement that this facility has been and will be operated under the threshold levels as outlined in the Regulation NCAC 2Q .0102(d). Please be advised that the operation of any air pollution emission sources which results in increased emissions in excess of the threshold levels specified in 15A NCAC 2Q.0102(d) without an Air Quality Permit is a violation of 15A NCAC 2Q.0101, "Required Air Quality Permits." If this facility is required to obtain an Air Quality permit in the future because of increased emissions, each day of operation of the emission sources without an Air Quality Permit represents a separate violation. Such violations may be subject to enforcement action pursuant to NCGS 143-215.114A.

Please be aware that even though your facility may no longer be subject to permitting requirements, the operations must still comply with all applicable state and federal laws and regulations. The attached Facility Compliance Tracking Checklist may be of help to you in verifying you remain in compliance with certain federal and state regulations. It may also aid in determining if you remain below the emissions threshold. You may use this checklist at your discretion as it is intended to be used as a guidance document only. Furthermore, it is DAQ's intent to periodically conduct compliance assurance visits at exempt facilities. If you have any questions with reference to the above matter, please do not hesitate to contact Charles McEachern at 919-791-4200.

Sincerely,

Patrick Butler, P.E., Regional Supervisor
Division of Air Quality, NCDEQ

Facility Compliance Tracking Checklist

revised 06-16-2016

Calendar Year _____

Are calendar year emissions below exemption threshold?

Yes No

Annual Throughput (quantity of materials made or processed)

(i.e. concrete, asphalt, cotton, woodwaste generated, etc.)

Units (i.e. tons, pounds, bales, etc.)

Quantity of Fuels Combusted:

Natural Gas

_____ ft³

No. 2 fuel oil

Sulfur Content _____

_____ gallons

LPG

_____ gallons

Wood

_____ tons

Link to NSPS and NESHAP rule guidance:

<http://deq.nc.gov/about/divisions/air-quality/air-quality-permits/specific-permit-conditions-regulatory-guide>

NSPS Dc subject boilers:

Does fuel oil contain > 0.5% sulfur?

Yes No N/A

Was report submitted semi-annually?

Yes No N/A

Did you conduct timely opacity monitoring for >30mmBtu boilers on fuel oil?

Yes No N/A

NESHAP 6J subject boilers:

Date of last biennial/5 yr tune-up?

_____ N/A

Compliance certification on site?

Yes No N/A

NESHAP 4Z / NSPS 4I / NSPS 4J subject engines:

New emergency and non-emergency engines:

Certificate of Conformity on site?

Yes No N/A

Does fuel oil contain > 0.0015% sulfur?

Yes No N/A

Existing emergency engines:

Date of last oil change/analysis, belt/hose/filter/plugs inspection & maintenance?

_____ N/A

Number of hours run for non-emergency (includes testing & maintenance)?

_____ N/A

Existing non-emergency engines using a Diesel Oxidation Catalyst (DOC):

Date of last compliance source test?

_____ N/A

Notice of testing submitted ? 60 days prior to testing?

Yes No N/A

Did source test show compliance?

Yes No N/A

Does fuel oil contain > 0.0015% sulfur?

Yes No N/A

Is temperature continuously recorded and tracked as a 4 hour rolling average?

Yes No N/A

Is pressure drop recorded monthly?

Yes No N/A

Facility-wide Applicability:

Visible emissions >20% from any sources/devices?

Yes No

Any signs of dust leaving property or any complaints?

Yes No

Any new sources or control devices added?

Yes No

Were they evaluated for permitting?

Yes No

Inspection & Maintenance on control devices?

Yes No N/A

**The checklist is being provided only as a guidance document. Complying with this checklist does not ensure compliance with the regulations and does not absolve you from ensuring your facility is in compliance with all appropriate air quality regulations.
