Subject: Compliance Assurance Visit -Chocowinity Plant 901
Date: Tuesday, October 1, 2024 5:13:00 PM

Hi Ryan,

I visited the Chocowinity batch plant on 9/24 and did a quick compliance assurance visit with Tim Blackstock. Would you please send me the total cubic yards for this plant for CY2023? I've also emailed David asking for this total, but I only have his DPD email address.

Also, I'm updating information in our databases for ownership changes by Chandler Concrete Company. I do not see any data associated with the Powells Point-Chaney plant and the **Havelock Plant 906**. I'd like to add them as permit exempt facilities in our system so DAQ may know to conduct future periodic compliance assurance visits there. Would you please email me the cubic yds/hr capacities of these plants?

Thanks,
Betsy
